

THICK SKINNED AVOCADOS

There's a soft, creamy center beneath seasonally thick and bumpy skin.

THE GROWING CLIMATE FOR SOME AVOCADOS CAN NATURALLY RESULT IN A THICKER, BUMPIER SKIN.

These avocados are just as creamy and delicious inside when ripe, but the thicker skin calls for judging ripeness in a different way.

They may feel firm even when ripe, as the thick skin has less give. For these avocados, **gently press the narrow top of the avocado** to feel for softness.

Gently press the top!

KEEP YOUR EYES "PEELED" FOR THICK-SKINNED AVOCADOS BETWEEN MAY - SEPTEMBER.
