

WITH MISSION, IT'S ALWAYS AVOCADO SEASON

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

Each country of origin has its own unique climate and soil, and as a result our delicious avocados exhibit subtle physical differences based on where they were grown.

California

Bumpy, bright green skin when unripe. Skin will darken during ripening.

Mexico

Main Season: Slightly bumpy green or black skin with some ridging. Skin will darken during ripening.

Chile

Elongated shape, bumpy skin. Depending on maturity, skin may not darken during ripening.

Off Bloom: Smooth bright green skin. Skin may not darken and may possibly checkerboard during ripening.

Peru

Thick, bumpy skin that may turn amber/red when ripe. Skin may not darken when ripe; thick skin may feel firm even when ripe.

New Zealand

Elongated shape with thick, pebbly skin that changes from light green to deep brown when ripe.
